

CELL SIGNALING-TECHNOLOGY-NOW

Weightlifting For A Beautiful World, today I'm honored to have the privilege to introduce to you a life changing technology from a company that is helping people around the world to live healthier, fuller, longer quality lives. This technology will change healthcare as we know it, and can add years to our lives. A breakthrough in Cell Signaling technology has come to pass, the dawn of a new era for human life is upon us now, the seed of this enormous breakthrough is Redox Signaling molecules, that has 33 patents, no one else has it, there is no competition.

THE BREAKDOWN

Our cells are breaking down, none of us can escape, no matter

what kind of lifestyle we may live, we can not escape the consequences of age. Yes some of us live a healthy lifestyle, we eat the right foods, we exercise daily we give the body the proper rest. We meditate to receive peace, tranquility and mindfulness within ourselves. We feel healthy, we feel strong, and we feel and look good, we pat ourselves on the back, we tell ourselves that the sacrifices that we have made to be this way are paying off. However there is one element that we had forgotten to add into this equation, the environmental factors.

Although you may feel healthy and strong, your doctor at your last physical says you're doing great. However, the effects of cellular breakdown are definitely sneaking up on you like a bandit in the night. Current research shows that environmental factors such as the air we all breathe, our diet, stress and aging can actually hijack our body and turn off genes. Meaning the genetic instructions that dictate a healthy body functions will not get through. These consequences can manifest in every system of our body.

GLOBAL WELLNESS TRENDS IN FIVE BROAD AREAS OF HEALTH REFLECT THIS CELLULAR BREAKDOWN

1

Digestive Function

Digestive diseases are now the second-leading cause of disability due to illness in America.

2

Inflammatory Response

Chronic inflammation, that are often triggered by stress, is linked to almost all the major causes of disease-related death in the U.S.

3

Hormone Modulation

Hormone imbalances, affecting the production of our key sex hormones, that account for billions of dollars in our healthcare costs.

4

Cardiovascular System

One in every three deaths in the U.S. had cardiovascular disease listed as the underlying cause.

5

Immune System

It is estimated, as many as 50 million Americans suffer from autoimmune disease. The symptoms can affect all of our organs.

(1) DIGESTIVE FUNCTION—Digestive diseases are now the second-leading cause of disability due to illness in America.

(2) INFLAMMATORY RESPONSE—Chronic inflammation, that are often triggered by stress, is linked to almost all the major causes of disease-related death in the U.S.

(3) HORMONE MODULATION—Hormone imbalances, affecting the production of our key sex hormones, that account for billions of dollars in our healthcare costs.

(4) CARDIOVASCULAR SYSTEM—One in every three deaths in the U.S. had cardiovascular disease Listed as the underlying cause.

(5) IMMUNE SYSTEM—It is estimated, as many as 50 million Americans suffer from autoimmune disease. The symptoms can affect all of our organs.

How can we solve health problems before they even arise? That question has been in the mind of science and doctors for many decades. This amazing company, is now on the top of the mountain of the medical world with the biggest breakthrough in Cell Signaling technology of our time, they are screaming, we are the stepping stone.

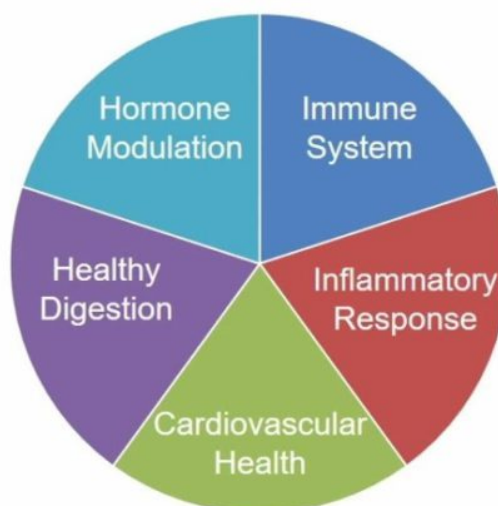

Redox Signaling molecules breakthrough have given the world a simple way to address the cellular breakdown. Not just mask the symptoms, but effectively attack the problems at the source-the genetic level. This unique breakthrough Redox Cell Signaling technology, that had indeed been scientifically tested, and had shown to signal the activation of genetic pathways or affect the genes that:

- * Improve the immune system health
- * Help maintain cardiovascular health and support arterial elasticity
- * Help maintain a healthy inflammatory response
- * Modulate hormone balance to support vitality and wellness
- * Improve gut health and digestive enzyme production

Genes Contain The Blueprint To Your Health

Clinically proven to increase gene signaling pathways by up to 31%

Redox is deeply driven by a vision of health care that works for everyone on this planet. Redox Cell Signaling supplement is the very first and only supplement on the entire market certified to contain active Redox Signaling molecules, with powerful cellular messengers that 100% help rejuvenate, protect, and restore cells. These molecules, native to our human body, are created through a extraordinary groundbreaking, patented process that reorganizes molecules of natural salt and purified water into Redox Signaling molecules.

**WHAT ARE
YOUR CELLS
TELLING YOU?**

Cell signaling in our body plays a large key role in regulating gene expression, and we are not just talking eye

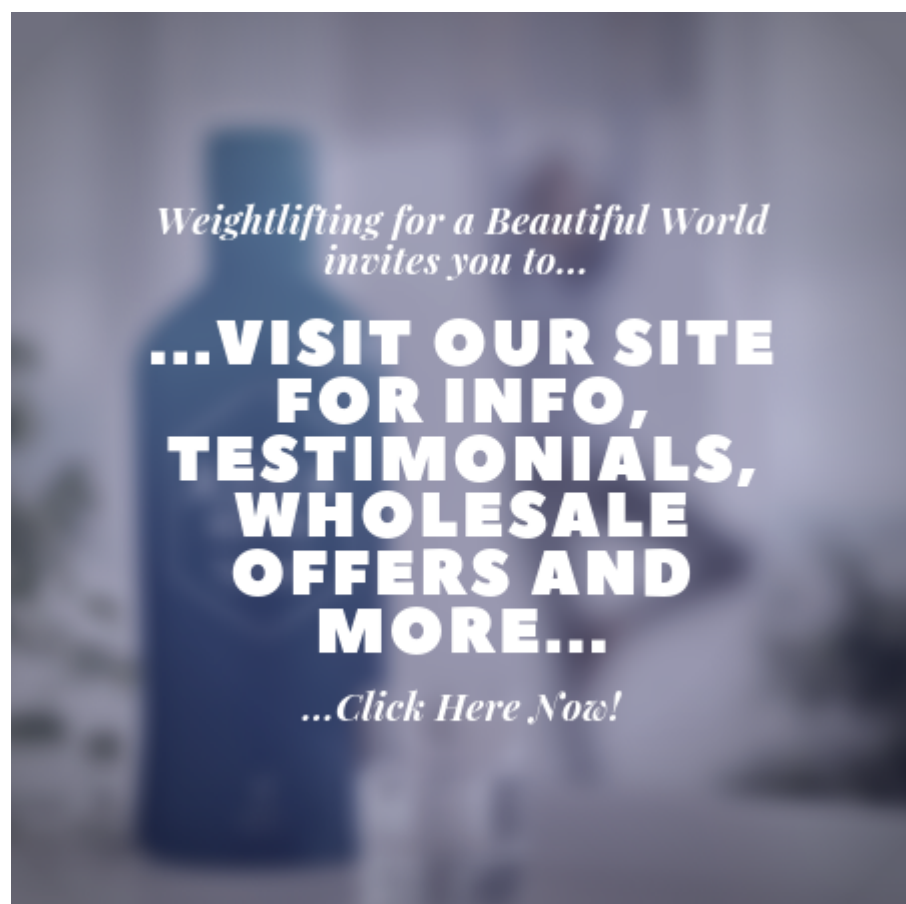

color here my friends, our genes do much more than dictate our physical characteristics. Genes give life sustaining instructions to cells, and our cells carry out those all important instructions to keep us alive and healthy. As we age, cell communication breaks down, the signal weakens, and the gene expression can be disrupted. By regulating gene activity with Redox Cell Signaling molecules will keep cellular communication strong.

The dream of the medical scientific community of manufacturing a product to keep cellular communication strong has come true. Redox Cell Signaling supplement can positively affect gene expression throughout our body, helping rejuvenate, protect, and keep our cells functioning at their optimal levels. We can now power our life. Drinking Redox every day is such a simple thing to do, it will enhance the ability of every cell in our body to facilitate positive gene expression, allowing all of us to experience the vitality of true good health and wellness.

What some thought was impossible has been achieved, the future is here now, to help the human race to live a longer healthier quality life. Engineered for new horizons in human existence, Redox Signaling molecules did not just meet initial expectations, Redox Signaling molecules exceeded them. Pioneering all possibilities, Redox Signaling molecules has delivered the breakthrough in Cell Signaling technology, building the network of cell regeneration of the future now. Drinking Redox every day can regulate genes and keep our cells talking, I personally noticed a big difference the first day

taking Redox Signaling supplement, I do understand that some people are going to be skeptical, I was one of those people, however I am not skeptical anymore, my friends it works. If you are willing to give it a shot, you will see a result, a life-changing result.

We here at Weightlifting For A Beautiful World are always in the pursuit of finding health products and technology that will help the Human race to be healthier, to live a longer quality life. Today I come to you humbly, truthfully. This Redox Cell Signaling supplement is truly a rare jewel for our world. Weightlifting For A Beautiful World give our stamp of approval for this amazing breakthrough of Cell Signaling technology with a 5 star rating, I encourage you to click on the link below to learn much more about this amazing breakthrough. There will be videos, there will be testimonies also, with scientific evidence for you to view.

May you be always in good health. Humbly yours Paul Earl
